Open Source Contributions

- Contributed to Bahmni open source project by ThoughtWorks.

- Contributed to the **GSSOC'21** as a mentor.

- Contributed to UICAP CSS Framework as a Mozilla KNIT Chapter Contributor.

Work Experience

Jan'21 - Present

Publicis Sapient, Bengaluru as Associate XT L2
KnowHow - Productivity Tool for Product Managers
- **KPI Dashboard Enhancement -** Refactored old code and incorporated new design of KPIs by which product managers can get summary of project health and velocity using Jira, Azure, Jenkins, and other tools for data aggregation. It helped us to **acquire 2 new clients after release.**
- Implemented enhanced way of running processors which reduced API calls and saved **server infra cost by approx 8%** according to townhall report.
- Improved user session management on frontend, and implemented internal caching for project summaries.
- Resolved **critical security issues** by implementing encryption and changed way of storing data in browser. **It helped to get clearance for open-source version release.**

US Based Leading Telecom company - B360 POS
- **Search and Advance Search -** Implemented search and advance search functionality from scratch by which sales reps can easily search for all kinds of carts with dates, environment, application, and order status.
- **Fallout Reason -** Implemented fallout reason feature on sales rep dashboard by which sales rep can track reason why user has dropped in between and reach back to user for order completion. It has increased **revenue by 1.8%** for retail channel according to client report.
- **Shared Cart -** Implemented different flows to give an option to sales rep by which he/she can open any cart created through any POS application and complete the order. **It decreased 2-day process into few minutes process.**
- Delivered modules **as a single UI team in a team for two tracks.**

Leveraging Knowledge in Angular, React and TypeScript.

Feb'20 - Jan'21

ThoughtWorks, Pune as Consultant - UI Developer
IDEAS Optics - Hospitality Technology SAS Company
- **Summary Report -** Used xlxs and excel.js to implement data export of a performance dashboard in one click in .xls format.
- **Dashboard Filter -** Used Aggrid to implement property filter functionality by which property manager can filter specific property by using search box and sort in alphabetical order as well.
- **Code Quality -** Kept track of sonar code quality reports after completion of Sprint and improved code as per requirement.
- **Chart Integration in KPI cards -** Done fusion chart integration in KPI card to show ADR of a specific property.
- **NPM-Audit Integration in Pipeline -** Integration npm-audit in bitbucket pipeline to get automated notification about vulnerable packages after scheduled Wednesday pipeline checkup.

Leveraged Knowledge in Angular 9, Jest, React, and Angular Testing library, TDD, XP, Pair programming, Fusion charts, Gerrit, Docker, and CI/CD pipeline

Feb'19 - Jan'20
